

Downloading the App

Download from the [App Store](#) or [Google Play](#).

You can run a search for the app. It is titled “Webcorp AXA Assistance” in the App Store and “Webcorp Mobile” in Google Play.

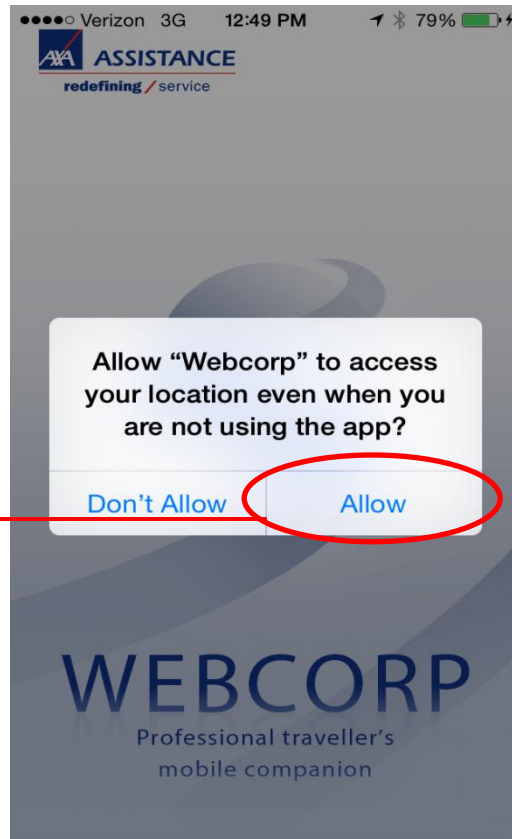

This is how the app icon will look

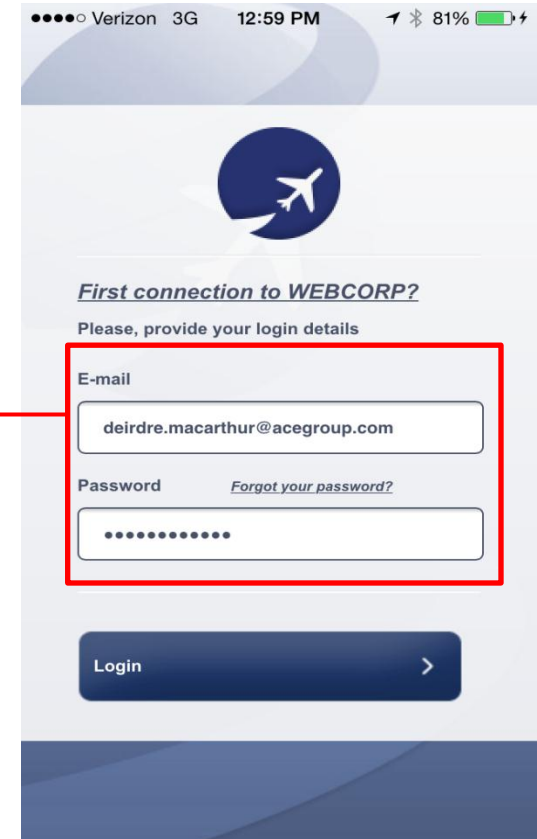

Logging In

If prompted, you can click “Allow” to turn on location services. This means that the app will automatically update to your current location without you having to elect it when you log in.

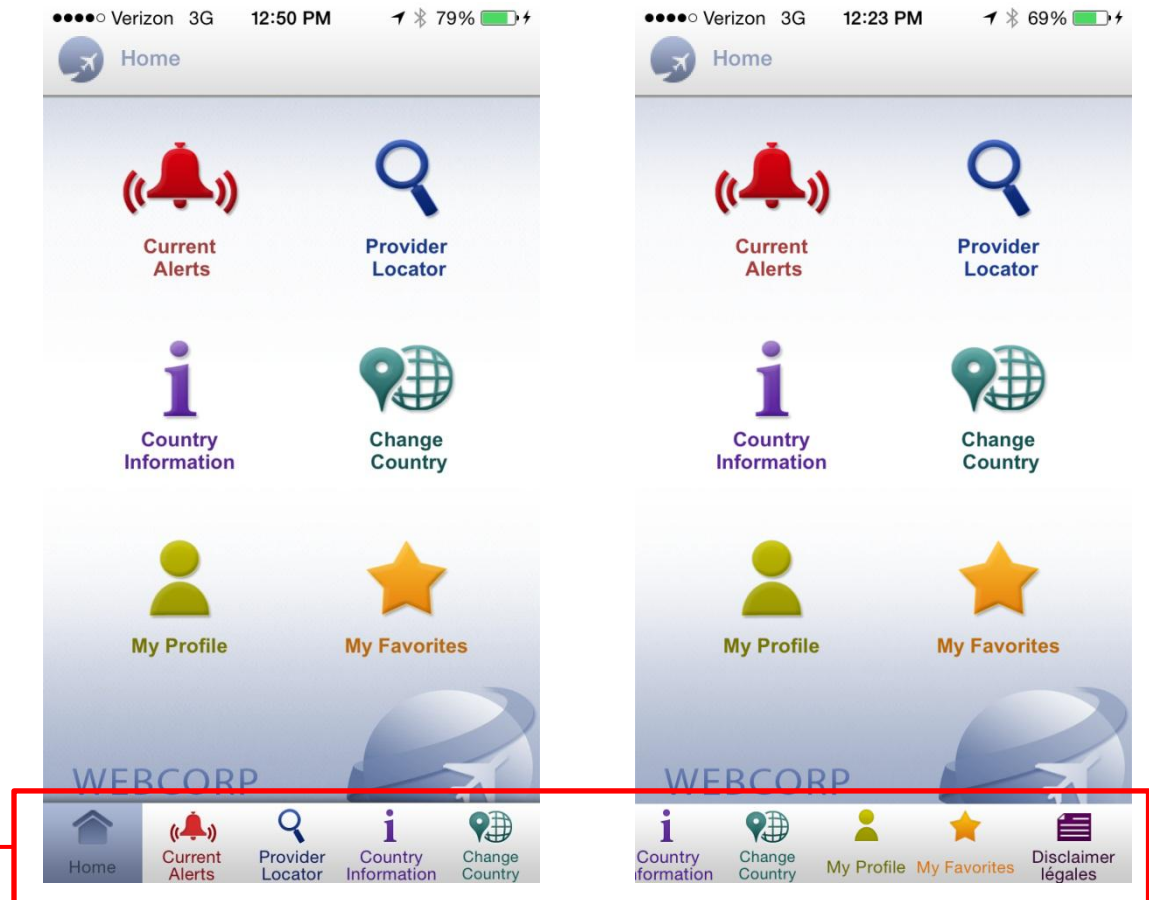

Use previously registered username (e-mail) and password to log in.*

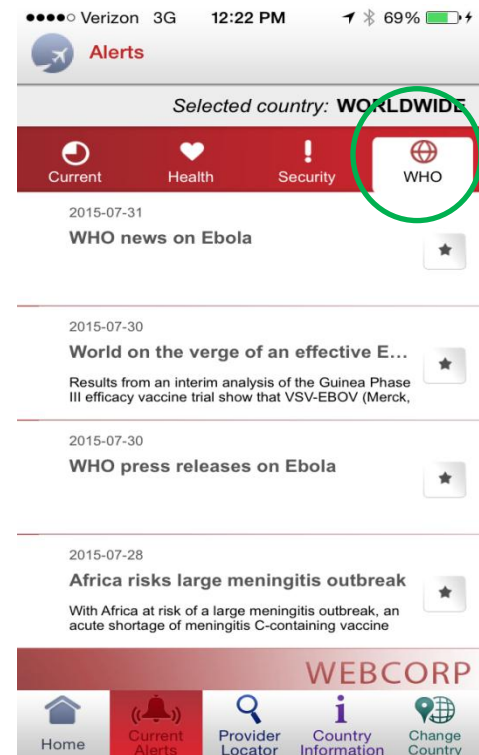

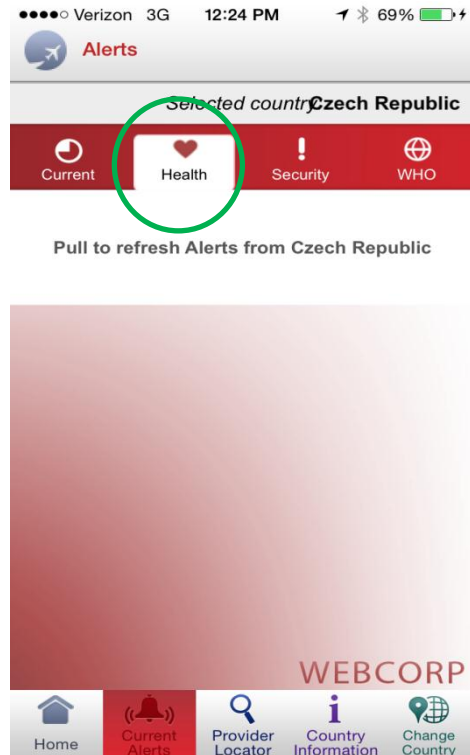

* Note to first-time users: To log on to the app, you should have registered previously on the web portal. To register – go to www.acetravelassistance.net and sign in with the username: medassist-usa@axa-assistance.us and password: acea&h.

Home Screen

This is the Home Screen. You can click into any of the icons. Scroll to the right on the bar for “My Profile,” “My Favorites,” and “Disclaimer”.

Current Alerts

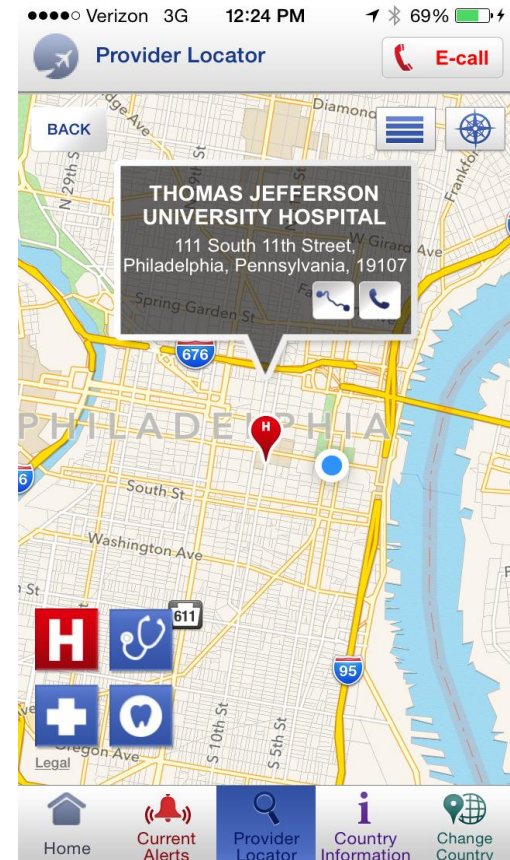

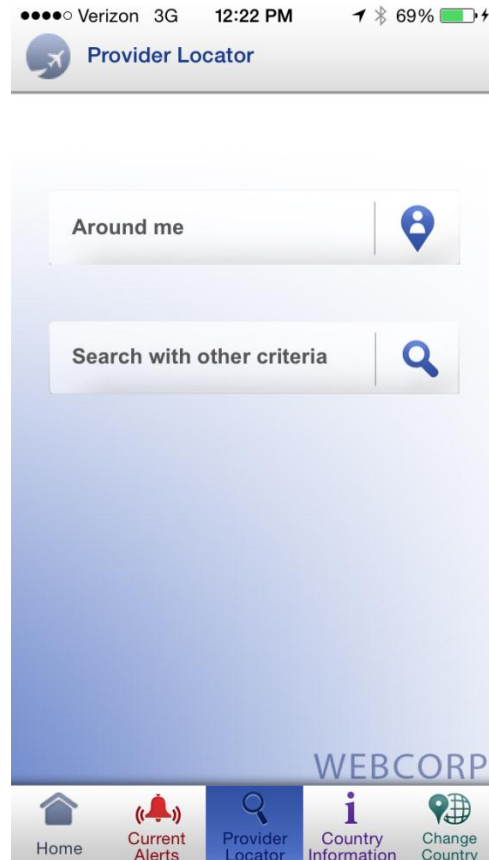

Based on your current country or the country selected, you will have access to health and security alerts, as well as World Health Organization (WHO) news.

Provider Locator

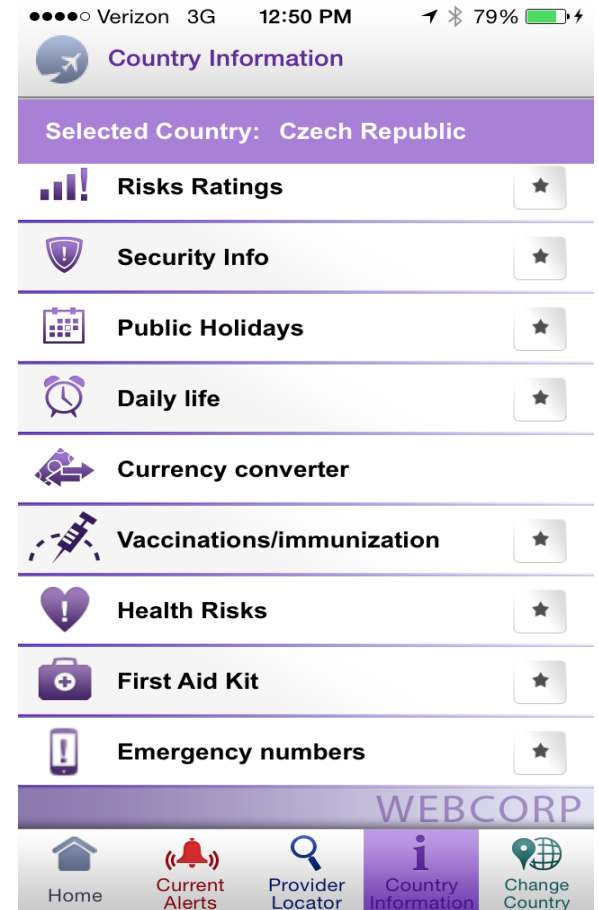

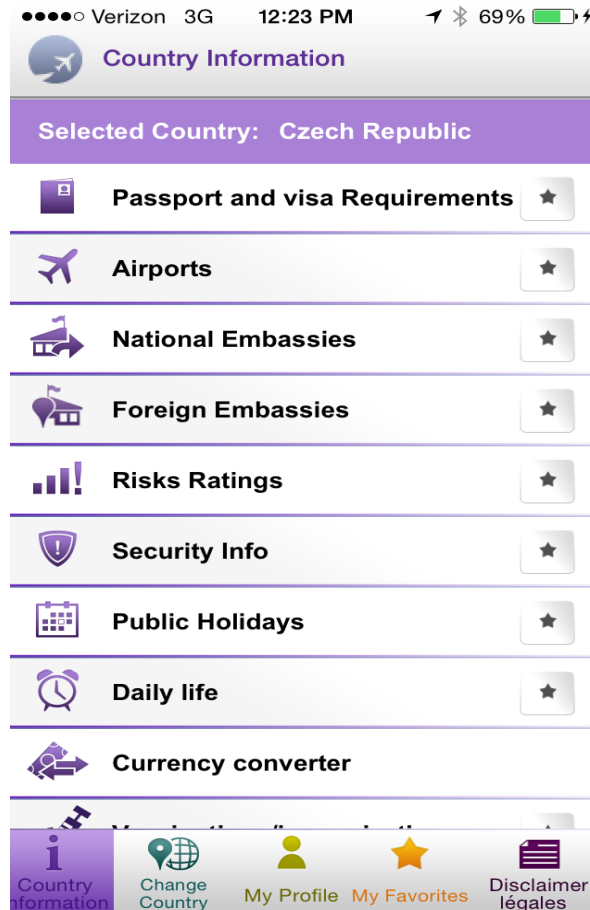

Search for providers around your current location, or by choosing another location.

You can search by provider type and specialty.

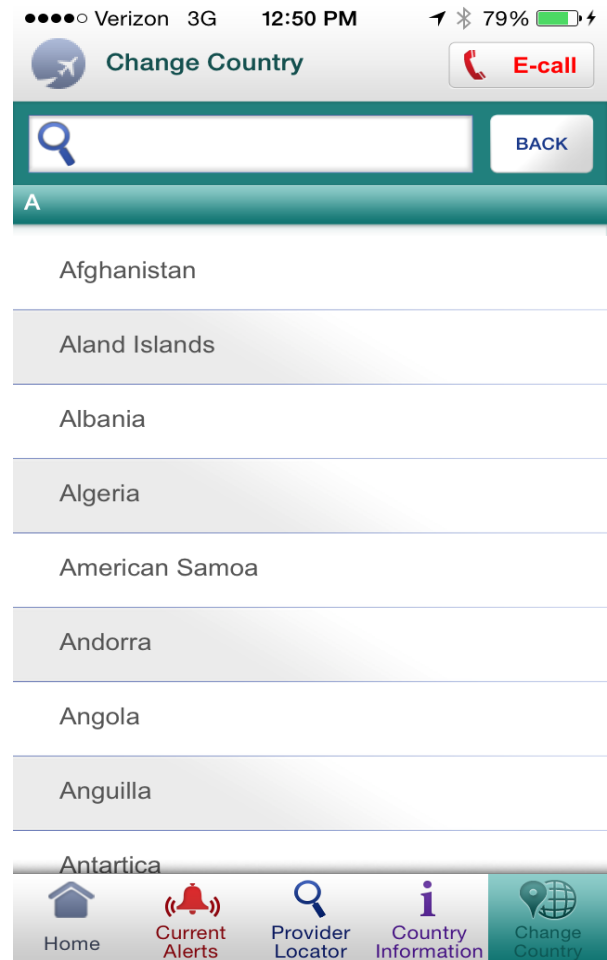

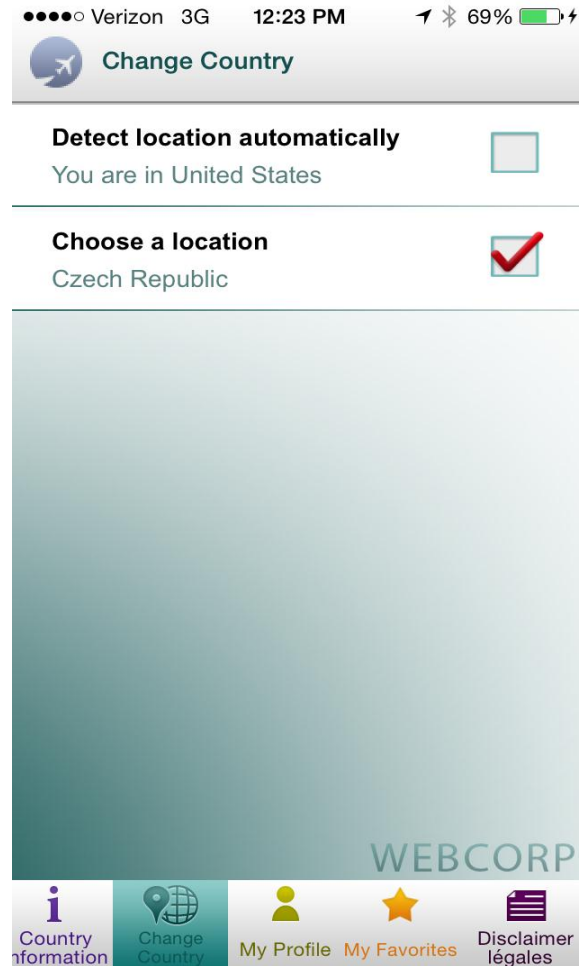

Country Information

Useful information about the country you are in, or have selected.

Change Country

Option to use location services to detect your current country, or choose another country.
