

Completing the Rainbow : Forever Changed Global Health Course Ecuador 2014

“My future nursing practice will forever be changed thanks to my experiences in Ecuador. I will always remember what it is like to not fit in and know the language. I will have compassion and understanding for my patients who speak another language besides English. I will also be more compassionate to the homeless patients I am assigned to.”

“I honestly feel like this experience has changed me as a person and I am sure others have started to see that. I am more caring, more in tune to what the difference is between a want versus a need, and more willing to do good for the betterment of others.”
