

# Culture & Communication

## Global Health in Ecuador 2014

“I will now be more culturally aware when working with patients from other countries in the hospital and am now more knowledgeable about Ecuador’s culture. Overall, it was an educational as well as rewarding experience that I would recommend to each and every nursing student in the nation.”

“I never thought I would feel the heartbreak I experienced when I got back to Tampa. Everyone has their fancy cars and suits and are complaining about the free ties they got are the wrong color. I kept thinking back to the kids who had no running water, bathrooms with mold halfway up the wall, and hair infections, yet they were the happiest, sweetest kids I ever met.”
